**GoShare Healthcare** is a customisable patient education and content distribution platform.

**GoShare** enables you to send tailored health information to patients, quickly and easily by email or sms.

**GoShare** gives you access to credible, evidence-based resources including:

- Patient stories
- Animations
- Information sheets
- Tools and resources

GoShare uses technology that everyone is familiar with.

*My colleague and I use GoShare frequently and confidently because it's easy to use and we know it is checked and kept up to date. From a health coaching perspective, the ability to select resources to be delivered at spaced intervals is a great plus.*

*Our patients really appreciate not having their inbox filled in one go and the staggered arrival of information gives them a chance to digest it and lessens the likelihood of feeling overwhelmed. Thank you for enabling this resource!*

Julie Scordel - Practice Nurse

Chronic Disease Management — Primary Prevention  
[goshare.realtimehealth.com.au](http://goshare.realtimehealth.com.au)

## Features

- Access to 800+ patient and carer stories about managing illness
