Codeine Changes - Are You Prepared?

Codeine is being up scheduled on 1 February 2018 to prescription only. This change will significantly affect a number of groups including consumers, Pharmacists, General Practice and the Alcohol and Other Drug sector. This facilitated discussion is designed to bring these various groups together to discuss ways to best manage this change and the potential emergence of presentations of poorly managed pain and/or codeine dependence in primary care.

Discussions will be centred on how we can work together to get the best outcomes for these patients; appropriate referrals and what clinicians need in the form of support and education for the changes.

This change will affect everyone in primary care so it's important to be part of the conversation!

Panel discussion facilitated by Pene Wood, Opioid Management Clinical Advisor, Western Victoria PHN

Finger Food will be provided
