

Women's health across the lifespan

This symposium will include Q+A interactive sessions, case studies and rotating workshops covering a wide range of topics.

Speakers

- Dr Emily Huning** – Pregnancy risk assessment
- Dr Michael Shembrey** – Pre-eclampsia & bleeding in pregnancy
- Dr Cameron Jeremiah** – Infections in pregnancy
- Dr Adam Roberts** – Female bone health
- Dr Philippa Shilson** – The family at risk
- Dr Julie Lamont** – Gynae-oncology
- Dr Shannon McCarthy** – Polycystic Ovary Syndrome
- Dr Tiki Osianlis** – Infertility/IVF
- Dr Sam Mehr** – Allergies in children
- A/Prof John Massie** – Prenatal testing for genetic and respiratory disease in children
- Deborah James** – Update of prenatal genetic testing and diagnostic testing

Learning outcomes

1. Formulate a safe management plan for the family at risk for poor child health outcomes
2. Distinguish between the common and severe complications in pregnancy
3. Outline investigations to facilitate infertility diagnosis and select the various IVF technologies/treatments
4. Diagnose polycystic ovary syndrome using the appropriate diagnostic criteria
5. Evaluate the modifiable risk factors for osteoporosis
