

Women's Health

An update in ultrasound – post menopausal bleeding and perinatal diagnosis

Epworth Geelong and Siles Health are hosting a Category 2 update for GPs focusing on early pregnancy-dating and viability, post-menopausal bleeding and prenatal testing and ultrasound at Siles Health.

Speakers

Rosheen Green – Sonographer

Early pregnancy-dating and viability

Dr Charles Siles – Obstetrician and Gynaecologist

Post-menopausal bleeding

Deborah James – Associate Generic Counsellor, Siles Health

Prenatal testing and ultrasound at Siles Health

Learning outcomes

1. Detail how to safely assess and manage bleeding in the post-menopausal woman
2. List what is assessed in an early (6-10 week) obstetric ultrasound
3. Specify the different screening and diagnostic prenatal tests available to the pregnant woman

RACGP CPD Points

Please note this activity is undergoing accreditation and is pending 4 Category 2 QI&CPD points.
