

# INVITATION

DO YOU KNOW THE FRACTURE HISTORY OF YOUR PATIENTS AGED OVER 50?  
DO YOU KNOW WHICH PATIENTS ARE AT RISK OF HAVING ASYMPTOMATIC  
VERTEBRAL FRACTURES, PUTTING THEM AT HIGH RISK FOR HIP FRACTURE?

Please join us at the *Find the Fracture* meeting and learn practical skills  
and management tips from a local expert in osteoporosis.

## **This case-based, practical meeting covers:**

- » Identifying who is at risk of osteoporotic vertebral fractures
- » Ordering X-rays to check for vertebral fractures
- » Hands-on learning of how to read X-ray films to check for vertebral fractures
- » Management to reduce fracture risk

**Date:**

**Time:**

**Venue:**

**Address:**

---

**Places are limited. Register now – complete the form on the reverse and  
fax to 02 8026 8326 or email to [ResponseMgmtMeetings@au.imshealth.com](mailto:ResponseMgmtMeetings@au.imshealth.com)**

# FIND THE FRACTURE

By identifying minimal trauma fractures, assessing patients and managing them according to guideline recommendations you can reduce their risk of future fracture.<sup>1</sup>

Minimal trauma fractures due to poor bone health result in pain, disability and premature mortality in both women and men.<sup>2</sup> Every minimal trauma fracture increases the risk of future fractures. The risk of a subsequent hip fracture following any minimal trauma fracture is 2–4 times that of the age-matched population who are fracture-free.<sup>3</sup>

## AGENDA

Arrival and sign-in (30 minutes)

**Identifying minimal trauma fractures, including vertebral fractures with case discussion (50 minutes)**

Dinner (30 minutes)

**Practical assessment of X-ray films and reports, and management of osteoporosis (40 minutes)**

Dessert and coffee

## TO REGISTER FOR THIS EVENT:

FAX TO:

**02 8026 8326**

EMAIL TO:

**ResponseMgmtMeetings@au.imshealth.com**
